

Enhancing Hotel Connectivity with Cost-Effective GPON Solutions

The Connor Serviced Residences

Greenhills Center, San Juan City

2024 - Ongoing

Hospitality

The Connor Serviced Residences, managed by Hospitality Innovators, Inc. (HII), is a premium hotel strategically located in the vibrant district of Greenhills. Designed to offer a home-away-from-home experience, the property blends modern aesthetics with thoughtfully curated amenities, ensuring a comfortable and memorable stay for their guests.

1 Challenges

Seeking a cost-effective GPON solution that delivers reliable Wi-Fi connectivity for guests while seamlessly integrating smart TVs and IP phones.

2 Reasons for Choosing Omada

Omada's Access Points and VIGI CCTVs provided cost-effective and reliable connectivity in their offices as well as comprehensive CCTV surveillance solutions.

3 Successful Results

By implementing the Omada GPON System in their guest rooms, they were able to achieve reliable connectivity for guest internet, IP phones, and smart TVs. In high-traffic areas such as rooms, meeting rooms, lobbies, and other common spaces, the deployment of Omada High-Density models has successfully optimized network performance, efficiently managing multiple wireless devices while controlling traffic per device to prevent congestion. The installation and configuration of the Omada GPON System were handled by Techone Telecommunication Services Inc.
